What is Safety Audit?

The term safety is of great importance in order to ensure that the day-to-day operations of organizations are carried out smoothly without any disruption. We all know that there is always a potential hazard that is related to our daily operations.

The Safety Audit is the most comprehensive way to evaluate the effectiveness & efficiency of the Health & Safety management system implemented at an organization. Industrial Safety Audit is conducted as per the IS 14489:2018. IS 14489:2018 is the code of practice on Occupational Safety and Health Audit. The standard establishes Audit objectives, criteria, and practices and provides guidelines for establishing, planning, conducting, and documenting audits on occupational safety and health systems at the workplace.

The Safety Audit helps an organization to understand the gaps in the health & safety management system and provide guidance for continual improvement. The Safety audit acts as a proactive tool that prepares the organization to eliminate or minimize the potential hazard, thereby strengthening its Health & Safety management system.
